

Amplifier Built-in

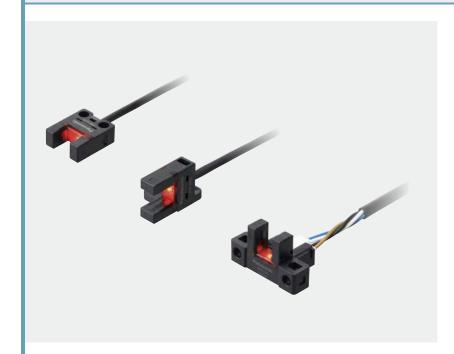

U-shaped Micro Photoelectric Sensor

PM-25 SERIES PM-45 SERIES PM-65 SERIES

U-shaped Micro Photoelectric Sensor Amplifier Built-in

PM-25 SERIES PM-45 SERIES PM-65 SERIES

One step ahead in performance and mounting ease

Three protection circuits standard on all models PM-25/45/65 SERIES

All models are standardly equipped with the following protection circuits in their compact bodies. These protection circuits minimize the possibility of sensor malfunctions caused by erroneous wiring.

- 1 Reverse supply polarity protection circuit
- 2 Reverse output polarity protection circuit
- ③ Output short-circuit protection circuit

Ample beam emitting / receiving distance of 6 mm 0.236 in PM-25/45/65 SERIES

The beam emitting and receiving sections are 0.5 mm 0.02 in thinner than those on our conventional models while their external dimensions are the same. As a result, the distance between the beam emitting point and receiving point increased by 1 mm 0.039 in. The wider distance means less possibility of collision between the sensing section and sensing object.

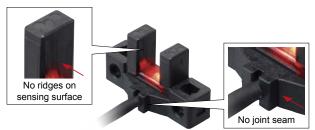

Industry's first*! IP64 rating

*As of April 2017, in-company survey.

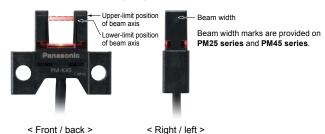

PM-25/45 SERIES

Our original integrated molding method has eliminated grooves and gaps on the sensing surface and main body, thus reducing the possibility of malfunctions caused by splashing water or dust.

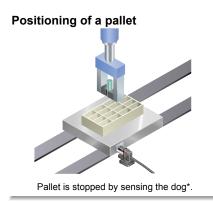

Beam marks for easy adjustment PM-25/45/65 SERIES

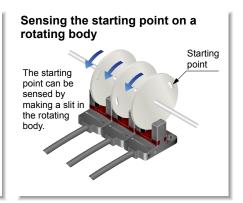

The upper-limit and lower-limit positions of beam can be visually confirmed from the front, back, right and left sides of the sensor unit. This allows easy adjustment of the position of sensing object.

APPLICATIONS

Sensing the starting point and overrun of a moving body Overrun sensing Dog Starting point sensing Starting point and overrun is sensed using the dog* on the base.

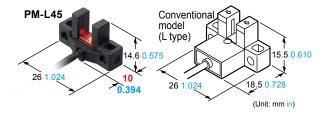

Large and easy to see Multi-angle operation indicator PM-25/45/65 SERIES

The large operation indicator (orange) lights up when the beam enters. The indicator is easy to see from above and from the sides.

Compact size

PM-45 SERIES

All new models require significantly less mounting space than our conventional models when mounted with the same pitch. What's more, the new models can directly replace our conventional models currently in use.

All models easy to mount with M3 screws

PM-25/45/65 SERIES

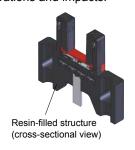

The sensor unit can be installed with one or two M3 screws. * M3 screws and washers are not included.

- Models requiring one M3 screw for installation PM-F25, PM-R25, PM-F65, PM-R65
- Models requiring two M3 screws for installation Models other than above

Resistant to vibrations and impacts

PM-25/45/65 SERIES

The sections where stress concentrates, such as the connecting section of the cable and internal circuit, are covered with a resin. This helps prevent malfunctions caused by vibrations and impacts.

VARIATION

Sensors come in various shapes to suit a wide range of mounting conditions

Ultra-small / Cable type

PM-25 SERIES

Easy mounting with M2/M3 screws!

NPN output	1 m 3.281 ft cable	3 m 9.843 ft cable	1 m 3.281 ff bending- resistant cable
PNP output	1 m 3.281 ft cable	3 m 9.843 ft cable	1 m 3.281 ft bending- resistant cable

Compact / Cable type

PM-45 SERIES

Compact size!

NPN output	1 m 3.281 ft cable	3 m 9.843 ft cable	1 m 3.281 ft bending- resistant cable
PNP output	1 m 3.281 ft cable	3 m 9.843 ft cable	1 m 3.281 ft bending- resistant cable

Compact / Connector built-in type PM-65 SERIES

Easy connection with a single touch using commercially-available connectors

NPN output	Connector attached cable 1 m 3.281 ft, 2 m 6.562 ft, 3 m 9.843 ft, 5 m 16.404 ft	Connector attached bending-resistant cable 1 m 3 2 m 2 m 3 m 1 m 4 m 5 m 1 m 1 m 1 m 1 m 1 m 1 m 1 m 1 m 1
PNP output	Connector attached cable 1 m 3.281 ft, 2 m 6.562 ft, 3 m 9.843 ft, 5 m 16.404 ft	Connector attached bending-resistant cable 1 m 3/2511, 2 m 3/3021, 3 m 0.8451, 5 m 16.4041

^{*&}quot;Dog" refers to the sensing object for activating the sensor's detecting operation.

Ultra-small / Cable type PM-25 SERIES

Easy mounting with M2/M3 screws!

* NPN output / 1 m 3.281 ft cable length type only (Excluding bending-resistant cable type)

Wei	ght		Net weight: 10 g approx.,	Gross weight: 15 g approx.	Net weight: 30 g approx., Gross weight: 35 g approx.			

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +23 °C +73.4 °F.

2) The response frequency is the value when the disc, given in the figure below, is rotated.

- 3) In case the PM-25 series is used at an ambient temperature of +50 °C +122 °F, or more, make sure to mount it on a metal body.
- 4) Note that the cable of **PM**-□**25-R** loses its flexibility when the ambient temperature decreases to about -10 °C +14 F°
- 5) The cable of PM-\(\to 25\)-R is a bending-resistant cable usable on a moving base. When the sensor is mounted on a moving base, secure the sensor cable joint at the unit in place so that stress is not applied to it.
- 6) When storing PM-a25-R, make sure that the cable does not come into contact with the sensing section or operation indicator.
- 7) If the cable is extended to 20 m 65.617 ft or longer, confirm that the supply voltage at the end of the cable attached to the sensor is 4.5 V or higher.

Recommended crimping tool

Model No. : YC-610R (Manufactured by J.S.T. Mfg. Co., Ltd.) Note: Contact the manufacturer for details of the recommended products.

I/O CIRCUIT AND WIRING DIAGRAMS

NPN output type

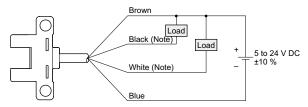

I/O circuit diagram

Note: Ensure to insulate the unused output wire.

Symbols...D: Reverse supply polarity protection diode ZD1, ZD2: Surge absorption zener diode Tr1, Tr2: NPN output transistor

Wiring diagram (PM-25 series / PM-45 series)

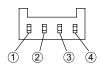

Note: Ensure to insulate the unused output wire.

Output operation

	Color code	Output operation
Output 1	Black	Light-ON
Output 2	White	Dark-ON

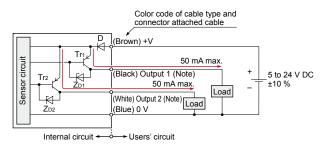

Terminal arrangement diagram (PM-65 series)

Terminal No.	Designation
1	+V
2	Output 1: Light-ON
3	Output 2: Dark-ON
4	0 V

PNP output type

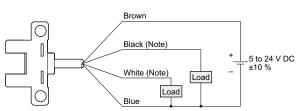

I/O circuit diagram

Note: Ensure to insulate the unused output wire.

Symbols...D: Reverse supply polarity protection diode ZD1, ZD2: Surge absorption zener diode Tr1, Tr2: PNP output transistor

Wiring diagram (PM-25 series / PM-45 series)

Note: Ensure to insulate the unused output wire.

Output operation

	Color code	Output operation	
Output 1	Black	Light-ON	
Output 2	White	Dark-ON	

Terminal arrangement diagram (PM-65 series)

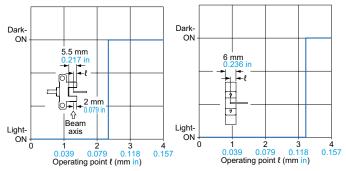

Terminal No.	Designation
1	+V
2	Output 1: Light-ON
3	Output 2: Dark-ON
4	0 V

SENSING CHARACTERISTICS (TYPICAL)

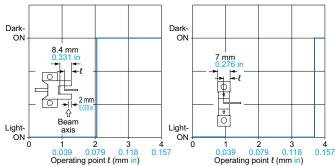

PM-25 series

Sensing position

Sensing position

PRECAUTIONS FOR PROPER USE

- Never use this product as a sensing device for personnel protection.
- In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

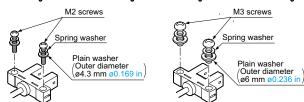

Mounting

PM-25 series

 The following conditions must be observed when using screws to mount the sensor unit.

Screw	Spring washer	Flat washer	Tightening torque	
M2 screw	1 pc.	ø4.3 mm ø0.169 in (small round washer)	0.15 N·m	
M3 screw	1 pc.	ø6 mm ø0.236 in (small round washer)	0.5 N·m	

< When using M2 screws for mounting > < When using M3 screws for mounting >

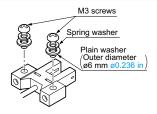

When using the optional mounting screw set **MS-M2**, a spring washer is included.

 In case the PM-25 series is used at an ambient temperature of +50 °C +122 °F, or more, make sure to mount it on a metal body.

PM-45 series

• The following conditions must be observed when using screws to mount the sensor unit.

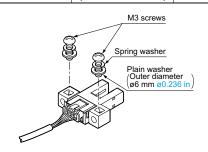

Screw	Spring washer	Flat washer	Tightening torque
M3 screw	1 pc.	ø6 mm ø0.236 in	0.5 N·m

PM-65 series

 The following conditions must be observed when using screws to mount the sensor unit.

Screw	Spring washer	Flat washer	Tightening torque
M3 screw	1 pc.	ø6 mm ø0.236 in (small round washer)	0.5 N·m

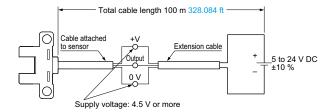

PRECAUTIONS FOR PROPER USE

Cable extension

PM-25 series / PM-45 series

 Cable extension is possible up to an overall length of 100 m 328.084 ft with a 0.3 mm², or more, cable.
 However, since a voltage drop shall occur due to the cable extension, ensure that the power supply voltage at the end of the cable attached to the sensor is within the rating.

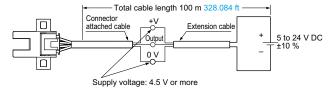

But, when the overall cable length, including the cable attached to the sensor, is as given below, there is no need to confirm the voltage.

Conductor cross-section area of extension cable	Total cable length
0.08 to 0.1 mm ²	Up to 5 m 16.404 ft
0.2 mm ²	Up to 10 m 32.808 ft
0.3 mm ²	Up to 20 m 65.617 ft

PM-65 series

 Cable extension is possible up to an overall length of 100 m 328.084 ft with a 0.3 mm², or more, cable.
 However, since a voltage drop shall occur due to the cable extension, ensure that the power supply voltage at the end of the connector attached cable of the sensor or at the sensor terminals is within the rating.

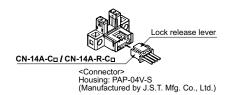

But, when the overall cable length, including the cable attached to the sensor, is as given below, there is no need to confirm the voltage.

Conductor cross-section area of extension cable	Total cable length
0.08 to 0.1 mm ²	Up to 5 m 16.404 ft
0.2 mm ²	Up to 10 m 32.808 ft
0.3 mm ²	Up to 20 m 65.617 ft

Wiring (PM-65 series)

Connection method

 Insert the connector attached cable CN-14A-C□ / CN-14A-R-C□ in the connector part of this product as shown in the figure below.

<Connector pin position>

Connector pin No.	1	2	3	4
Terminal designation	+V	Output 1	Output 2	0 V

Disconnection method

 Press and hold the lock release lever to disconnect the cable connector.

Note: Pulling the cable without pressing the lock release lever in an attempt to disconnect the connector can cause wire breakage in the cable or damage to the connector.

When using the product as an S-mark compatible product in Korea

• The power supply cable and output cable connected to the product must be less than 10 m 32.808 ft.

Others

- This device has been developed / produced for industrial use only.
- Since the sensor is intended for use inside machines, no special countermeasures have been taken against extraneous light. Take care that extraneous light is not directly incident on the beam receiving section.

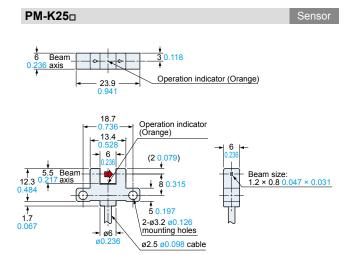

- Do not use during the initial transient time (50 ms) after the power supply is switched on.
- Note that the cable of PM-□25-R loses its flexibility when the ambient temperature decreases to about -10 °C +14 °F.
- The cable of PM-□25-R is a bending-resistant cable usable on a moving base. When the sensor is mounted on a moving base, secure the sensor cable joint at the unit in place so that stress is not applied to it.
- If the sensor is used in a place having excessive dust, periodically clean the emitting and receiving sections with a dry, soft cloth.
- If there is a large surge generating equipment, such as, motor, solenoid, electromagnetic valve, etc., in the vicinity of the sensor, use a surge absorber on that equipment.
 Further, do not run the sensor cables along power lines and use a capacitor between +V and 0 V, if required.
 Use the sensor after confirming that the surge has been eliminated.
